NEMO PRODUCT  
INNOVATIONS

NEMO is constantly developing new aluminum pole technology, hardware, and frame configurations to maximize the strength, wind resistance, interior volume, weight, and usability of our tents. We pursue simplicity and pure geometric forms wherever possible. Classic arch shapes are used to fend off top loads and catenary curves transfer tension through fabric panels. Every design element is deliberate and has a functional purpose, much like nature itself.

### HORNET™ 2P HIGHLIGHTS

**The DAC Jake's Foot corner anchor system** makes setup fast and easy. The Jake's Feet also improve fabric tension by acting as cantilevers to pull the corners of the inner tent closer to the ground.

**Triangulated volumizing guyouts** increase interior storage space by up to 15%.

Inner tent has a built-in **privacy panel** for extended coverage and security.

**Hubbed pole intersections** create a single pole for quick setup, allowing free-standing support and minimizing pole weight

**An integrated Light Pocket™** diffuses light from your headlamp to cast an even glow throughout the tent.

**Our new Divvy™ Sack** dual-stage stuff sack fits the tent and poles or adjusts smaller to further compress the tent and split the load.

**Dual vestibules** provide ample gear storage, and two doors makes entry and exit easy for all.

### **HORNET™ 2P ACCESSORIES**

FOOTPRINT

**Footprints** reduce the wear and tear on your tent floor from contact with the ground. They are made of 70D abrasion-resistant nylon fabric and perfectly sized to your tent. The fabric is PU coated for water-proofness.
