NEMO PRODUCT
INNOVATIONS

NEMO is constantly developing new aluminum pole technology, hardware, and frame configurations to maximize the strength, wind resistance, interior volume, weight, and usability of our tents. We pursue simplicity and pure geometric forms wherever possible. Classic arch shapes are used to fend off top loads and catenary curves transfer tension through fabric panels. Every design element is deliberate and has a functional purpose, much like nature itself.

META™ LE 2P HIGHLIGHTS

Webbing loops locate trekking pole tips and reinforced areas at the top of the tent receive pole handles.

Dual vestibules/entries eliminate jostling for position and offer generous gear storage.

Vestibules roll back with a shed-style overhang for weather protection and refreshing airflow.

META™ LE 2P ACCESSORIES

Footprints reduce the wear and tear on your tent floor from contact with the ground. They are made of 75D abrasion-resistant nylon fabric and are perfectly sized to your tent. The fabric is PU coated for waterproofness.
