NEMO PRODUCT
INNOVATIONS

NEMO and our pole manufacturing partner, DAC, are constantly developing new aluminum pole technology, hardware, and frame configurations to maximize the strength, wind resistance, interior volume, weight, and usability of our tents. We pursue simplicity and pure geometric forms wherever possible. Classic arch shapes are used to fend off top loads and catenary curves transfer tension through fabric panels. Every design element is deliberate and has a functional purpose, much like nature itself.

VEDA™ 1P HIGHLIGHTS

Pole tip anchors locate the tips of crossed trekking poles and reinforced areas at the top of the tent receive pole handles.

Vestibule shed overhang provides weather protection and refreshing airflow.

VEDA™ 1P ACCESSORIES

Footprints reduce the wear and tear on your tent floor from contact with the ground. They are made of 75D abrasion-resistant nylon fabric and are perfectly sized to your tent. The fabric is PU coated for waterproofness.
