NEMO PRODUCT
INNOVATIONS

NEMO is constantly developing new aluminum pole technology, hardware, and frame configurations to maximize the strength, wind resistance, interior volume, weight, and usability of our tents. We pursue simplicity and pure geometric forms wherever possible. Classic arch shapes are used to fend off top loads and catenary curves transfer tension through fabric panels. Every design element is deliberate and has a functional purpose, much like nature itself.

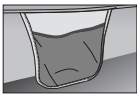

WAGONTOP™ 8P HIGHLIGHTS

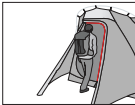

Large, screen porch with roll back fly and large screen windows on all sides provide great ventilation.

The Wagontop™ offers **large screen windows** on all sides. This creates great ventilation and adds to the home-like aesthetic.

Four interior mesh pockets provide a space for everyone to keep their small personal items.

Walk in height means that you won't need to duck or crouch while entering.

Fast and easy setup with only 2 hubbed poles, and one cross pole.

Standing height ceilings throughout the entire tent finally puts an end to awkward in-shelter changing and gear preparation.
